Careers

NSERC is committed to being an employer of choice by offering a progressive, positive and flexible work environment. We value our contribution to Canada and are proud of our reputation for supporting research excellence.

Natural Sciences and Engineering Research Council of Canada (NSERC) aims to make Canada a country of discoverers and innovators for the benefit of all Canadians.

NSERC researchers are on the vanguard of science, building on Canada's long tradition of scientific excellence. NSERC is the primary federal granting agency investing in research and research training in the natural sciences and engineering disciplines.

NSERC's role is to make investments in people, discovery and innovation to increase Canada's scientific and technological capabilities for the benefit of all Canadians. NSERC invests in people by supporting postsecondary students and postdoctoral fellows in their advanced studies. We promote discovery by funding research conducted by postsecondary professors and foster innovation by encouraging Canadian companies to participate and invest in postsecondary research and training.

Over the last 10 years, NSERC has invested more than \$7 billion in basic research, projects involving partnerships between postsecondary institutions and industry, and the training of Canada's next generation of scientists and engineers.

NSERC reports to Parliament through the Minister of Industry. It is governed by a President and a Council of distinguished members selected from the private and public sectors. The Council is advised by various standing committees that are guided by a peer review process.

We are an equal opportunity employer and encourage applications from women, members of a visible minority group, Aboriginal people and persons with disabilities.

People. Discovery. Innovation.
