

# wood.

Wood is a global leader in the delivery of project management, engineering, consulting and technical services to energy and built environment customers. We operate in more than 60 countries, employing around 60,000 people, with revenues of over \$10 billion.

So much of our success depends on feeling part of a team with people around us that we can rely on. What unites us is our values. They set the tone, help create our culture, give us one common set of principles and help us all have a great experience at work.

## Working with us?

You'll be challenged. You'll be encouraged to excel. You'll be given the opportunity to build a rewarding career. And you'll feel proud to be part of the team. You will be a part of a strong, global company shaping the future of the world's oil & gas, chemicals, environment & infrastructure, power & process, nuclear and mining markets.

We believe everyone at Wood has the opportunity to grow their career.

We do this by providing a range of learning resources and creating an environment where you gain insights and different perspectives from your colleagues, across a range of locations and sectors.

We also place huge importance on the partnership between employees and managers, we believe this helps everyone reach their full potential.

## Diversity & Inclusion

Our aim is clear. To continue to create a great working environment where everyone can be themselves and achieve their full potential; we want our employees to feel comfortable to bring their whole self to work and ensure we all have a safe space to do this.

Our Employee Networks help us achieve this. As well as representing our diverse workforce, they help to increase team work, share best practice, and connect our employees across the globe.

Are you ready to think about things differently and challenge the norm? We are too.
