Global  
opportunities.  
Richer  
experiences.

## Projects for an ever changing world

Welcome to SNC-Lavalin, a global Canadian success story that continues to change our world from offices and project sites across the country. Our projects in Canada have determined cities, created infrastructure and boosted our economy. We are proud that it continues to make a difference to generations of Canadians: from satisfying 60% of Ontario's power needs with Bruce and Darlington Nuclear Stations, to defining Montreal's growth with the New Champlain Bridge, minimizing environmental impact at John Hart, continuing to exceed commuting standards on the Canada Line, and creating breakthrough innovations to protect road users on Trans-Canada Highway.

## Equality & Inclusion makes us stronger

We welcome uniqueness. We believe diverse groups make better decisions – which leads to better business. So at SNC-Lavalin, from senior managers to all employees, we're committed to equality, inclusion & diversity.

By being honest, respectful and curious, we're making it happen together. It's giving each one of us the power to enhance the organization's performance in more positive ways. By working as one we're sharing the accountability and success for a happier work place, and greater opportunities for all of our people.
