

Welcome to SNC-Lavalin, a global Canadian success story that continues to change our world from offices and project sites across the country.

BUILDING A BRIGHTER FUTURE FOR CANADA

Our projects in Canada have determined cities, created infrastructure and boosted our economy. We are proud that it continues to make a difference to generations of Canadians: from satisfying 60% of Ontario’s power needs with Bruce and Darlington Nuclear Stations, to defining Montreal’s growth with the New Champlain Bridge, minimizing environmental impact at John Hart, continuing to exceed commuting standards on the Canada Line, and creating breakthrough innovations to protect road users on Trans-Canada Highway.

CONNECTING YOU TO THE WORLD

Our global headquarters are in Montreal and we have more than 7,000 employees in over 100 offices in Canada alone. At SNC-Lavalin you’ll enjoy endless opportunities to follow your career goals wherever they might take you.

WEAVING EQUALITY, DIVERSITY & INCLUSION INTO EVERYTHING WE DO

Every day, we’re striving to be more inclusive, more collaborative and more innovative in how we drive change.

Externally, this means making a positive impact on society through more inclusive and accessible design that’s sensitive to human differences with respect to ability, language, culture, gender, age and other forms of diversity. And it means using our global voice to champion progress through thought leadership.

Internally, we’re removing barriers in every region and at every level – spearheading change through trusted and inclusive leaders, increasing female representation across our whole organization, and broadening our talent pipeline to include all under-represented groups. This is supported by ground-breaking learning opportunities that unleash potential – giving our clients world-leading expertise.
