

Terracon is an employee owned consulting and field services business that has been serving resource, industrial and government based projects across Western Canada for 35 years.

We are a diverse business that specializes in geotechnical engineering, geoscience advisory and field services, materials testing, construction monitoring, drill rig monitoring, and instrumentation installation and monitoring. We have significant operations in both Calgary and Fort McMurray and are able to mobilize teams and field operations quickly to projects across Western Canada in order to serve our clients.

Grow With Us

As an employee owned, professional services firm, our greatest asset is our people. Our number one priority every day is creating an environment that allows our staff to safely challenge themselves and to build on their experience and skills.

When you join Terracon, you will be challenged to be better each day by your peers, your clients and the company leadership. When we add up the individual successes of our employees, we collectively grow as a company. Through growth come new opportunities and challenges for our employees, creating a positive upward spiral for your career.

One of our key values is empowerment. We encourage our employees to use their work experience, creativity and passion to take on new challenges. We believe every employee has the ability to shape their environment and improve both their role and the organization. We invite you to join Terracon, build your career and help shape the future of our company and the industry.

We are looking for people with passion, creativity, enthusiasm and expertise in their particular field who are committed to developing their expertise through hands-on experience. We firmly believe we have built an environment and have created the opportunities for our staff that will build careers and reward success.

As an independent, employee-owned company, we truly believe we have a unique environment where experienced professionals can take a major role in shaping the future of a private company and becoming technical and business leaders in both the company and the industry. This flexibility and independence are very influential factors in building an exciting and rewarding career.

Indigenous Engagement and Awareness

Our Philosophy

Terracon believes in strong and authentic working relationships with the communities in which we operate. We respect the traditions, culture, and values of Indigenous (First Nations, Métis, and Inuit) communities. We strive to build awareness of the communities we work in and the social and economic implications of industry on those communities. We respect the Aboriginal and Treaty rights of Indigenous people and the rights of those communities to develop their own economy. We seek opportunities to better understand those communities and working collaboratively with them.

Our Goal

We will continue to be a transparent organization and will reflect the communities in which we work. Our employees, clients, subcontractors and stakeholders will gain a greater awareness of Indigenous communities and impacts our industry has on those communities, and they will join us in building our Indigenous awareness and engagement initiatives.
